Message from Superintendent Ybarra; Old Business on SBAC technology

This is a recycled message and reminder with the SBAC season just around the corner. Data Recognition Corporation (DRC) has stated that support for Windows XP ended in April of 2014. Due to technology risks during the assessment window this coming spring, DRC will not be able to support Windows XP for the SBAC assessment. We will be communicating this message several times over the coming months, and if you have additional questions please contact Dr. Cheryl Finley at cfinley@sde.idaho.gov.

- Superintendent Ybarra
