Rural Education Support Centers Update

The **Rural Education Support Centers** legislation (RS24731) was heard in the House Education Committee this morning. Following an informative presentation of the legislation by Superintendent Ybarra, the committee moved to send the RS directly to the second reading calendar. This means that there was overwhelming support for the legislation by the committee, and they felt it unnecessary to hold another hearing—rather, the motion expedites the movement of the legislation directly to the House floor.
