SUPPORTING SCHOOLS AND STUDENTS TO ACHIEVE

Behavior Supports

- On-site/Virtual Coaching
- Office Hours
- "Just in Time" Online Modules
- Technical Online Modules
- Behavior Foundations Trainings

"All organizations [and systems] are designed intentionally or unwittingly to achieve precisely the results they get"

- R. Spencer Darling, Business Expert

So what kind of behavior is a "challenge"?

Challenging Behavior

1. Interferes with the student's ability to learn
2. Harmful to self or others
3. Puts child at risk for social problems

Is it the *child*?

If the challenging behavior occurs in the *child*,

Then it is logical to expect to change the child.

Is it the *child*?

Child

- She is a biter!
- He is a runner.
- Watch out! He's a kicker!
- That kid has problem behavior!

Is it the *environment*?

When we look at challenging behavior as occurring in **contexts**,

it's logical to expect to **change the context!**

Child or Environment?

Child	Environment
<ul style="list-style-type: none"> • She is a biter! • He is a runner. • Watch out! He's a kicker! • That kid has problem behavior! 	<ul style="list-style-type: none"> • When she is frustrated, she will try to bite. • When he is angry, he will run out of the classroom. • Suzy took his toy. He might try to kick! • That kid doesn't seem to know how to ask for help.

ALL

Behavior is Communication!

Form and Function

Form – what does the behavior *look like*?

Function (Purpose) – *what change results* from the behavior?

- Why it happens or what a person gets when they do this behavior

Form and Function

Form – what does the behavior *look like*?

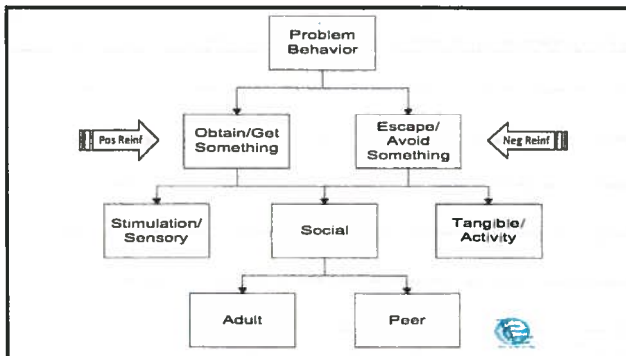

Function (Purpose) – *what change results* from the behavior?

- Why it happens, or what a person gets when they do this behavior

Behaviors Function as Tools

The fastest, most efficient way for a person to get what is wanted

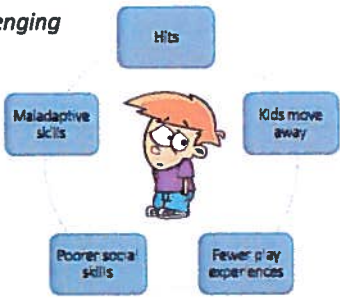

Why do they use *challenging* behavior?

Why *Challenging* Behaviors?

Skills Deficits	Behavioral Challenges
<ul style="list-style-type: none">• Appropriate communication• Social skills• Independent performance• Self regulation• Executive Functioning (planning, sequencing, etc)	<ul style="list-style-type: none">• Crying• Hitting• Yelling• Refusal• Persistent attention seeking• Hand-flapping• Grabbing/kissing

Why *Challenging* Behavior?

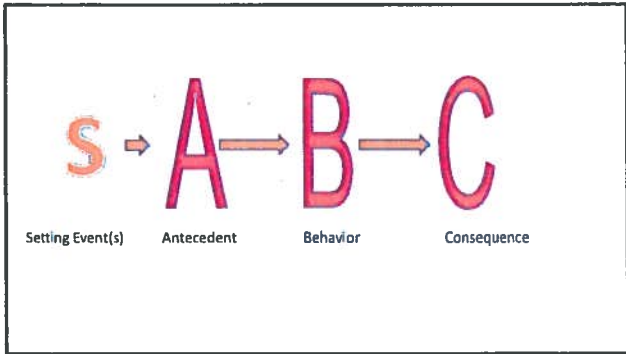

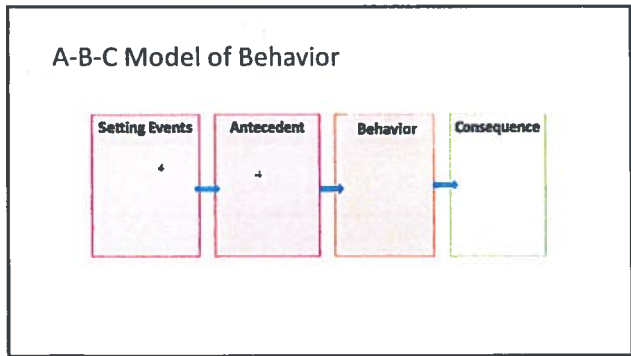

How Behavior is Learned

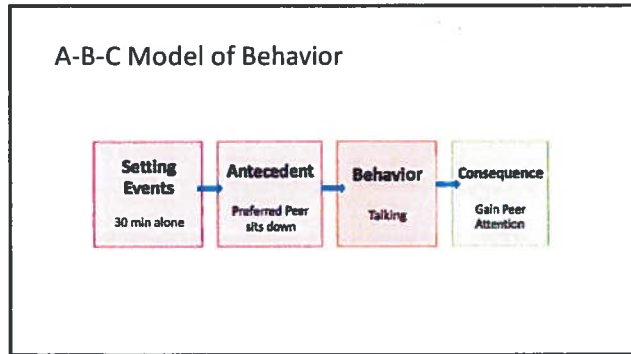

and WHY it is Repeated!

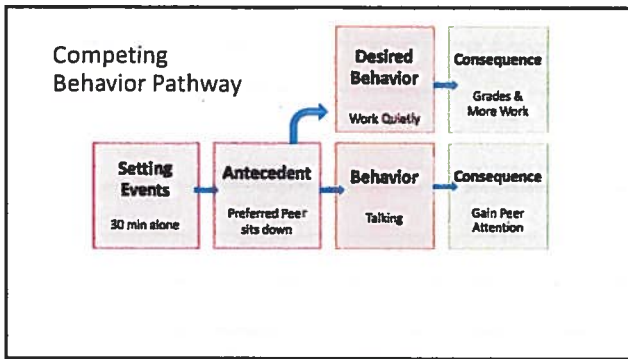

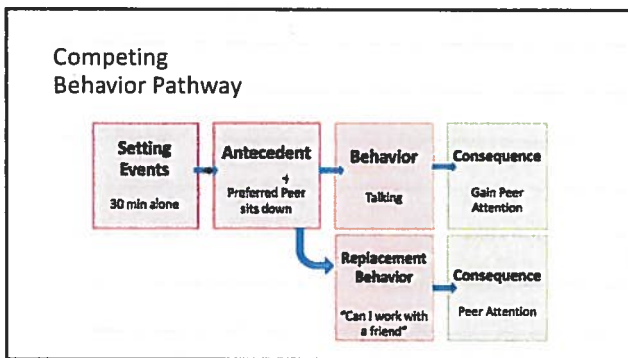

- ### What IS Reinforcement??
- Sticker?
 - Cake, candy?
 - Hug?
 - Money!

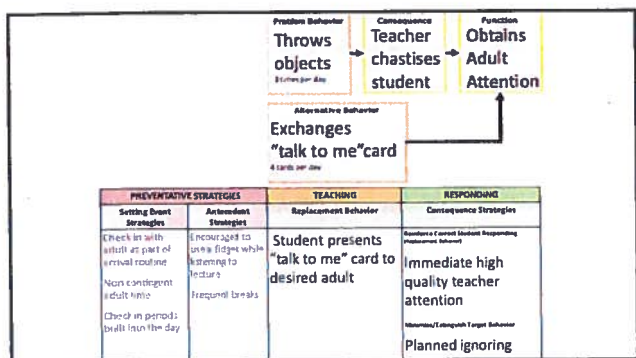

Maria

Ethical Considerations

Is the behavior "challenging"?

Challenging Behavior

1. Interferes with the student's ability to learn
2. Harmful to self or others
3. Puts child at risk for social problems

Are student needs being met?

Considerations for meeting student needs

- Desirable
- Impacts quality of life
- Fits the environment
- Practical (doable)

<http://www.autisminternetmodules.org>

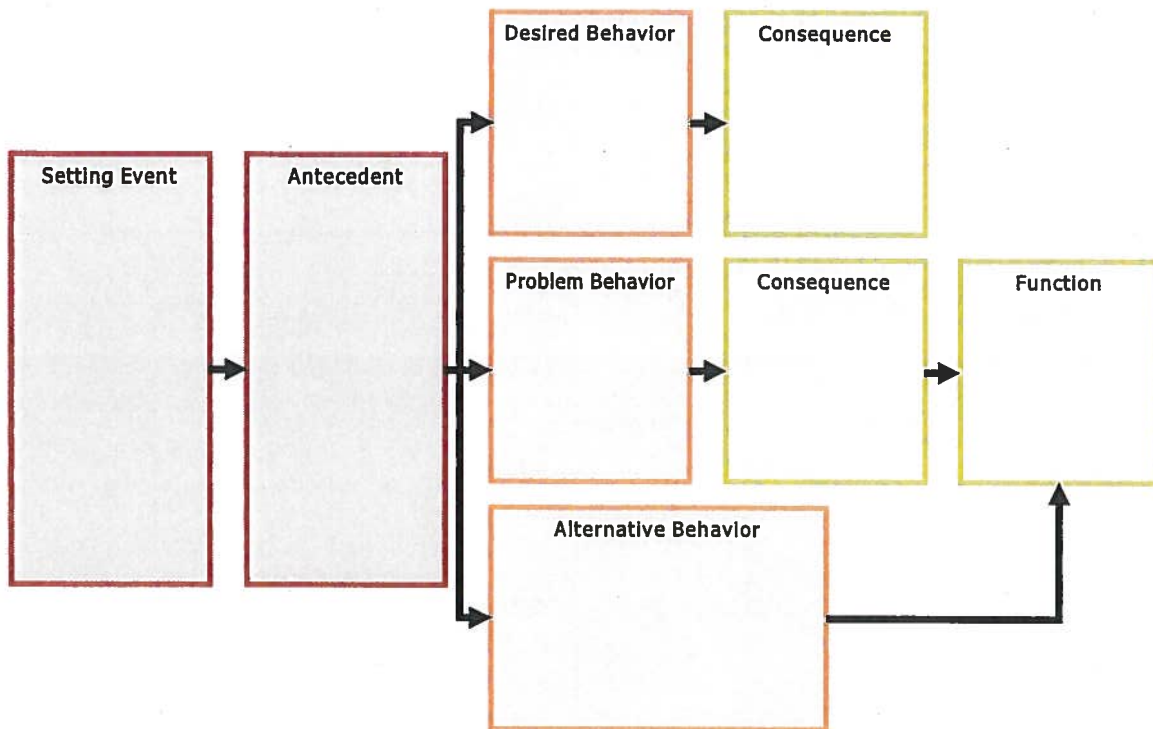

Take "Home" Points

- All behavior serves a function.
- FBAs are useful methods of identifying relationships between behavior and the environment
- Behavioral interventions are most effective when they are based on the function of behavior
- Data collection is crucial for evaluating effectiveness of interventions

Thank You!

BEHAVIOR SUPPORT PLAN COMPETING BEHAVIOR PATHWAY

PREVENTATIVE STRATEGIES		TEACHING	RESPONDING
Setting Event Strategies	Antecedent Strategies	Replacement Behavior	Consequence Strategies
			Reinforce Correct Student Responding (Replacement Behavior)
			Minimize/Extinguish Target Behavior
