

State Department of Education's Response to Negotiated Rulemaking on IDAHO CONTENT STANDARDS – HEALTH EDUCATION

Docket No. 08-0203-1601

In the public comment received on the Health Education Standards revision, there were several actionable items from two people about some language additions to 6-8 and 9-12 “Decision Making Standard”. The wording was added to the examples related to Alcohol, Tobacco, and Other Drugs about the “consequences of a criminal record”. This example was added to our list in the grade bands of 6-8 and 9-12.

The other actionable item was about clarifying the meaning of environmental exposure in Standard 1: Core Concepts: Alcohol, Tobacco and Other Drugs. The example added was “second hand smoke/vapors from vaping” to Standard 1 in grade bands 3-5, 6-8, and 9-12.
