#### Cengage Learning

##### World Cultures & Geography Eastern Edition

- **Grades 6-8**
  - **Strengths:** This book balances text, images, and stories. On every page there is informational text and along with that text students will find either a graph, map, or some sort of image that supports the text. Throughout the book the student will also discover articles where they are invited to not only learn about modern day problems but also challenged to find solutions. For example on page 200 and 201 students learn about problems facing Africa's wildlife and are then challenged to become a global citizen and consider ways of protecting African big cats amongst other animals. This text contains colorful maps of the western hemisphere. These maps include physical, political, economic, population and many other forms of maps and graphs. The book along with the pictures that are contained in it are bright and capture the attention. The book is well organized with units, chapters, and sections. At the end of each section there is an ongoing assessment to help students recall what they have previously learned and then at the end of each chapter there is a review and assessment. These assessments are scaffolded very well and sectioned off on different parts so that if the teacher would like to assess just one part they are able to. There are also data, graphs and maps students are asked to analyze. One of the many resources for the teacher is the teacher's edition. The TE is not one book but about 5 smaller books. Each book is 1 unit so as to make finding worksheets, guided projects, and sections of the reading more user friendly.

### myWorld Geography Survey (Eastern and Western Hemisphere)

- **Grades 6-8**
  - **Strengths:** The My World Geography textbook is targeted for middle school students, 6-8th grade, and all areas of the Western Hemisphere are represented within the text. The My Story sections profiles each region represented in the Western Hemisphere by using a personal interest story of a student in the age range of the targeted reader ex. pg. 255: Daniella's Coffee Run. The student journal can be used to enhance learning and there is an online version of the text to expand learning through technology. The textbook could stand alone without student journals because each chapter has analysis sections within the 21st Century Learning sections, ex. pg. 246: Young and Unemployed in Middle America. Charts, maps, and compare/contrast sections are used throughout the text, ex. pg. 247, 248, 276. Each chapter has an assessment section, with some high level and some basic questions. Students are directed to use the online version for 21st Century Learning in problem solving, ex. Analyze Media Content, pg. 277. This textbook and materials are visually appealing and has a consistent sequence of activities throughout the book. The personal stories (My Story) could be accessed online or read in hard copy format, ex. "Shaimaa's Neighborhood." connected to the student journal, and students answer the question: "What does Shaimaa's story tell you about life in North Africa?" Each chapter has maps and charts for comparison purposes, ex. pg. 552 with essential question: How much does geography shape a country? Assessments have both higher and basic level questions. The DBQ's are basic multiple choice questions, but they are effective to generate a discussion, ex. pg. 733 - documents on South Asia, comparing country's arable land. The teacher guide (Pro Guides) are divided up in multiple booklets and has Differentiated options for higher level students as well as those with special needs, ex. T28 - subject Patterns of Government in Arabia -objectives are stated, and suggestions on how to connect the material to relevance for today, how to adjust for special needs, how to challenge high level thinking, and how to differentiate for ELL students. The student journal has many writing prompts and writing graphic organizers, ex. T36 -T37, Writing to the prompt: What are the challenges of diversity? The journal pages give guidance and then practice in setting up a piece of historical writing. The map and illustrations are specific to the regions represented and

are colorful and easy to read. The textbook is specific to all regions within the Eastern Hemisphere and covers the history of the region, relationship to other countries, political systems and relationship to the United States. It is more than a geography book as it represents the cultural aspects of the various places within the Eastern Hemisphere.

- **Weaknesses:** This text has an extensive coverage of the Western Hemisphere, so weaknesses are few. The text doesn't just cover the geography of a region, it covers the historical background and present day problems of targeted regions as well. If a geography course was a semester long, much of the offered text would need to be set aside to fit curriculum time frame. This text book covers the regions of the Eastern Hemisphere extensively, with both cultural and geographical aspects and goes into detail about the history of the regions. It may be difficult to fit the curriculum scope and sequence into the time frame needed with using this text. The Pro Guides have many suggested activities, but because there are multiple mini sections, searching for the correct guide may hinder planning lessons.
