	<b>Notes:</b> Highly recommended.					
	<b>Key Features:</b>					
	Science Fusion is a K-8 program designed to allow students and teachers complete access to investigation, engineering and design opportunities through three key elements: 1. An interactive write-in student edition, 2. A comprehensive, robust digital curriculum, and 3. A comprehensive hands-on inquiry-based lab program.					
	Science Fusion inquiry expands on the notion that learning objectives and goals are met through only hands-on experiences. Students understand and apply the process and skills of scientific investigation through applications using multiple modalities within the Science Fusion program. Engineering and inquiry skills are applied daily as students interact with concepts presented in the write-in student edition which becomes a record of their predictions, observations, conclusions, and thoughts about the concepts being introduced. Students bolster their inquiry skills by exploring the virtual labs, digital lessons, and video-based projects. These key tools of inquiry are easily accessed through Science Fusion's digital curriculum.					
	In grades 6-8, inquiry lab activities are located in the Lab Manual, (available in print, DVD, and online. DVD and online versions allow easy editing and print options.) This Lab Manual, for each module, contains labs at all 3 levels of inquiry as well as differentiated lab datasheets for each chapter lab. The Lab Manual contains 2 inquiry experiences for every lesson, STEM labs, and as many as three labs at the conclusion of each module.					
	Virtual Labs are an integral component of Science Fusion's digital curriculum. Each Virtual Lab reviews important concepts developed in the previous lessons while providing students with the virtual equipment and investigative procedural structure. Students are encouraged to use the provided print datasheets or they can save/print the Lab Report "captured" while completing the Virtual Lab. A minimum of two virtual labs are available for every unit of grades 6-8.

	<b>Key Features:</b>						
	Science Fusion is a K-8 program designed to allow students and teachers complete access to investigation, engineering and design opportunities through three key elements: 1. An interactive write-in student edition, 2. A comprehensive, robust digital curriculum, and 3. A comprehensive hands-on inquiry-based lab program.						
	Science Fusion inquiry expands on the notion that learning objectives and goals are met through only hands-on experiences. Students understand and apply the process and skills of scientific investigation through applications using multiple modalities within the Science Fusion program. Engineering and inquiry skills are applied daily as students interact with concepts presented in the write-in student edition which becomes a record of their predictions, observations, conclusions, and thoughts about the concepts being introduced. Students bolster their inquiry skills by exploring the virtual labs, digital lessons, and video-based projects. These key tools of inquiry are easily accessed through Science Fusion's digital curriculum.						
	In grades 6-8, inquiry lab activities are located in the Lab Manual, (available in print, DVD, and online. DVD and online versions allow easy editing and print options.) This Lab Manual, for each module, contains labs at all 3 levels of inquiry as well as differentiated lab datasheets for each chapter lab. The Lab Manual contains 2 inquiry experiences for every lesson, STEM labs, and as many as three labs at the conclusion of each module.						
	Virtual Labs are an integral component of Science Fusion's digital curriculum. Each Virtual Lab reviews important concepts developed in the previous lessons while providing students with the virtual equipment and investigative procedural structure. Students are encouraged to use the provided print datasheets or they can save/print the Lab Report "captured" while completing the Virtual Lab. A minimum of two virtual labs are available for every unit of grades 6-8.

<b>McGraw-Hill</b>	<b>Life iScience: Student Edition</b>	<b>Keeley, et al</b>	<b>2012</b>	<b>6-8</b>	<b>9780078880025</b>	<b>Highly Recommended 92% 7<sup>th</sup> grade Science</b>
	Notes: Highly recommended for grade 7 science.. Recommended as "Resource Only" for Physical science at a 60% correlation; 6 <sup>th</sup> grade science at a 57% correlation and Earth Science at 79% correlation. CCSS correlation of 90%. Key Features: Is an innovative and engaging middle school earth science program. Each chapter focuses on a Big Idea that students explore using the 5E lesson cycle of Engage, Explore, Explain, Evaluate, and Extend. Multiple opportunities for inquiry allow students to explore and interact with each Big Idea in depth. Students are presented with Essential Questions in each lesson and are provided with varied alternative experiences to discover the answers. As part of the backwards design process, the entire program, including the labs and activities, the text, the visuals, and the assessments, was constructed to build student understanding of the Key Concepts behind the Essential Questions.
