Announcing ACCUPLACER'S New Learning Resources

Overview

Learning Resources is a **free** tool that provides hundreds of learning exercises to help strengthen students' knowledge and gives teachers an increased ability to enhance student learning. Upon completion of ACCUPLACER® testing, students are assigned Learning Locator™ codes that will deliver specific materials targeted to the growth areas identified on their Individual Score Reports (ISR). Educators can review Learning Resources and use the convenient Assignment Sheet feature to create collections of material **individualized** for their students, including their own uploaded resources.

How to Use Learning Resources

Begin by collaborating and brainstorming with key stakeholders at your institution. Think of ways you could use Learning Resources to complement your institution's programs and enhance the learning experience for your students. Some possible ideas include:

- Summer Bridge Programs
- Test Prep Sessions
- Remediation Prior to Retesting
- Corequisite Resource Tool

Next, think about the operational step. Consider giving teachers and faculty ACCUPLACER Site Reporter access so they can develop plans to share student results via the following reports:

- Score Roster Report
- Placement Roster Report
- Custom Report

You can try out the Learning Resources for yourself using the pass phrase ACCU_edu when creating your account. Reviewing the Perspective User Guide is a great way to gain insight.

For More Information

ACCUPLACER offers webinars that are available on the Zoom Public Event List page. Type ACCUPLACER into the Search field to see upcoming webinar events. If you need assistance sharing the vision with your leadership or need training tools to support rollout, the ACCUPLACER team is available to support you and can be contacted via email at accuplacer@collegeboard.org.
