

October 2010

Dear Parents,

We are thinking about the needs of children and parents as we make plans for this year. Your child is involved in our school's Title I math/reading support program taught by Mrs. Chesnut and Mrs. K. We are asking you to help us think about how the program affects your child's experience in school.

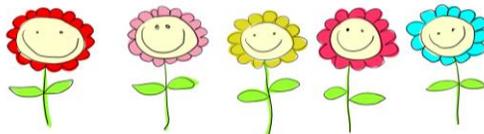

Please answer the following questions and send this paper back to school with your child. **We appreciate and value your opinions! Your answers will help us improve our program.**

- 1. If you were telling another parent about the extra support your child receives in reading/math, what would you say?**
- 2. How might we improve the program?**
- 3. How would you like to become more involved in your child's education?**
- 4. Circle the number below which best describes your view of the extra support your child receives.**
