#	Торіс	Topic Owner(s)	Discussion	Next Steps
1	Welcome & Call to Order	Laura Wallis, Chair Julie Mead, SDE Special Education Director	 Welcome to Julie Mead, the new SDE SPED Director Round-robin Introductions of attendees This is Brenda's last month with SEAP; if you have any documents that need to be submitted, get them in quickly. 	
2	Approval of November 14, 2022 Minutes	Laura Wallis	 Review of November meeting notes. Motion to accept minutes: Katie Flores Second: Brian Darcy Discussion: None Approved unanimously 	
3	DMS 2.0 – OSEP Preparation	Debi Smith, SDE	 Differentiated Monitoring Support (DMS) <u>Phase 1: Discovery</u> – Started November 2020 and runs through October 2023 	

			 Julie knows there will be feedback and areas that need improvement. She also wants to make sure participants are able to identify the items we ARE doing and doing well. Describe the state's process on developing and implementing policies related to services. Julie's response: They are asking what is the state's process in creating guidance for IDEA. We have coordinators across the state, information and monitoring about fiscal items, and Idaho SESTA puts guidance around implementing policy. 	
4	Morning Break			
5	SPP/APR Indicators	Alisa Fewkes, SDE	 State Performance Plan (SPP)/Annual Performance Report (APR) Review of highlights in the SPP/APR. If you see a minus (-), that means we did not make progress in that Indicator. There are some indicators that are still a minus (-), but there is an overall improvement and indication that Idaho is moving in the right direction. No highlight indicates there was some progress but less than 1%. Want this document to be forward facing, so if you have feedback, please provide. Identification, Indicators 11 and 12: There were a lot of eligibility being determined, but the IEP was not developed by the student's 3rd birthday. As a result, there will be a lot more education provided to districts. The largest issue is related to communication and tracking down the family. Last October, they started a new tracking system for the Infant Toddler Program to communicate with the school district. This process now happens nightly instead of monthly. Placement, Indictors 6A-C: Because Idaho does not fund early childhood education, these numbers are still not great. 41% of our childcare centers across the state are at capacity. Equity, Indicators 4A, 4B, 9, and 10: Seeing sustained measures here due to a significant disproportionality work. 	Provide feedback on this handout to Alisa Fewkes.

shift from virtual or hybrid to being in school full-time. • Indicator 32: Doing some research to see if the ®"grade scores are potential impacted from CO VID. • Indicator 32: Reset this target: this is our first year of data, therefore, the progress shows as N/A. • Data is not comparable because we used a different state's data to start. • Early Childhood Outcomes, Indicator 7: Continuing to see a decrease in performance/lack of progress. Some of these numbers may be what they are due to COVID and the lack of ability for parents to engage in pro-social activities such as parent groups, playgroups, etc., when there were quarantines in place. • Dispute Resolution, Indicators 15-16: Teams/families tend to go towards mediaton, not the resolution process. • When resolutions are withdrawn or dismissed, they do not count towards this measure. • Secondary. Indicators 1, 2, 13, and 14: All of the data from these are a year back from previous indicators (this is from our pandemy indicators (this is from our pandemy indicators (this is from our pandemy indicators 1, 2, 13, and 14: All of the data from these are a year back from previous indicators (this is from our pandemic year where we had soft closures). It shows inflated numbers due to this reason. • Saw increases in employment (indicators 14B and 14C). • Will be looking at how they can revise the questions in 14B and 14C – if they respond with '1 don't Know'', they are thrown out of the measure. • Also saw a decrease in the number of large school districts participating in this survey, which will also be looked at. Indicator 1 Summary – Graduation
 Indicator 34: Doing some research to see if the 8th-grade scores are potential impacted from COVID. Indicator 3C: Reset this target; this is our first year of data; therefore, the progress shows as N/A. Data is not comparable because we used a different state's data to start. Early Childhood Outcomes, Indicator 7: Continuing to see a decrease in performance/lack of progress. Some of these numbers may be what they are due to COVID and the lack of ability for parents to engage in pro-social activities such as parent groups, playgroups, etc., when there were quarantines in place. Dispute Resolution, Indicators 15-16: Teams/families tend to go towards mediation, not the resolutions are withdrawn or dismissed, they do not count towards this measure. Secondary, Indicators (this is from our panetics (this and 14C – if they respond with "1 don't know", they are thrown out of the measure. Also baw a decrease in the numbers of large school districts participating in this survey, which will also be looked at.
 see if the 8th-grade scores are potential impacted from COVID Indicator 3C: Reset this target; this is our first year of data; therefore, the progress shows as IVA. Data is not comparable because we used a different state's data to start. Early Childhood Outcomes, Indicator 7: Continuing to see a decrease in performance/lack of progress. Some of these numbers may be what they are due to COVID and the lack of ability for parents to engage in pro-social activities such as parent groups, playgroups, etc., when there were quarantines in place. Dispute Resolution, Indicators 15-16: Teams/families tend to go towards mediation, not the resolutions are withdrawn or dismissed, they do not count towards this measure. Secondary, Indicators 1, 2, 13, and 14: All of the data from these are a year back from previous indicators (this is from our pandemic year where we had soft closures). It shows inflated numbers due to this reason. Swinchass in enrollment for higher education (indicator 14A) but decreases in employment (indicators 14B and 14C - if they respond with '1 don't know', they are thrown out of the measure. Allso back and 14C. Will be looking at how they can revise the questions in 14B and 14C - if they respond with '1 don't know', they are thrown out of the measure. Also saw a decrease in the number of large school districts participating in this survey, which will also be looked at.
 impacted from COVID. Indicator 3C: Reset this target; this is our first year of data; therefore, the progress shows as IVA. Data is not comparable because we used a different state's data to start. Early Childhood Outcomes, Indicator 7: Continuing to see a decrease in performance/lack of progress. Some of these numbers may be what they are due to COVID and the lack of ability for parents to engage in pro-social activities succh as parent groups, playgroups, etc., when there were quarantines in place. Dispute Resolution, Indicators 15-16: Teamsfamilies tend to go towards mediation, not the resolution process. When resolutions are withdrawn or dismissed, they do not count towards this measure. Secondary. Indicators 1, 2, 13, and 14: All of the data from these are a year back from previous indicators (this is from our pandemic year where we had soft closures). It shows inflated numbers due to this reason. Sav increases in employment (indicator 14A) but decreases in employment (indicators 14B and 14C). Will be looking at how they can revise the questions in 14B and 14C – if they respond with 71 don't know", they are thrown out of the measure. Alkow the age show dust in a survey, which will also be looked at.
 Indicator 3C: Reset this target; this is our first year of data; therefore, the progress shows as N/A. Data is not comparable because we used a cilferent state's data to start. Early Childhood Outcomes, Indicator 7: Continuing to see a decrease in performance/lack of progress. Some of these numbers may be what they are due to COVID and the lack of ability for parents to engage in pro-social activities such as parent groups, playgroups, etc., when there were quarantines in place. Dispute Resolution, Indicators 15-16: Teams/families tend to go towards mediation, not the resolution process. When resolutions are withdrawn or dismissed, they do not count towards this measure. Secondary, Indicators 12, 13, and 14: All of the data from these are a year back from previous indicators (this is from our pandemic). It shows inflated numbers due to this reason. Secondary, Indicators 14B and 14C). Will be looking at how they can revise the questions in 14B and 14C – if they respond with '1 don't know'; they are thrown out of the measure. All of the doxing at how they can revise the questions in 14B and 14C – if they respond with '1 don't know'; they are thrown out of the measure.
 first year of data; therefore, the progress shows as N/A. Data is not comparable because we used a different state's data to start. Early Childhood Outcomes, Indicator 7: Continuing to see a decrease in performance/lack of progress. Some of these numbers may be what they are due to COVID and the lack of ability for parents to engage in pro-social activities such as parent groups, playgroups, etc., when there were quarantines in place. Review of document provided; trying to
provide basic information of the Review handout
Indicator, the goal of the Indicator, where and provide
the data is pulled from, how it's feedback to Alisa
calculated, and why is this indicator
important.
 If you have feedback, please provide to Alisa.
○ Would it be helpful to understand
when we are seeing large dips,
what the SDE believes is the
reason behind this?

			• Goal is to make this forward
			facing for the public.
			SDE will be making one of these
			summary sheets for each Indicator.
			Discussion of Data
			Laura: Not enough information to know
			where we are. Need to be clear on
			where the pandemic impacted the data.
			Heather: Why is the goal to increase by
			5%? Why did we pick the
			measurements we did? Would be good
			to explain basis for the measurements.
			Alison: We as SEAP made the
			recommendations for the measurements.
			Can't get past what is important to her,
			which is the Secondary Indicators. It
			shows a greater need on secondary
			instruction, especially when it comes to
			employment. For Vocational Rehab,
			there appears to be something wrong
			when these numbers are declining.
			Brian: The question itself (for post
			education employment/goals) may be
			wrong and that may be the reason for
			the decline in data. Debi: There would
			be value for SEAP to see the
			survey/questions that are being asked.
			Laura: Would be great after each section
			there were the questions asked. We do
			not know the context to the data. What
			questions are being asked, and who is
			being asked? This is important for SEAP
			to review and provide feedback. Julie:
			Survey is sent to parents after every due
			process or mediation.
			Julie would like SEAP to dive deeper into
			this data and ask the difficult questions.
			When she first saw the data, she
			struggled with the 8 th -grade math
			proficiency indicator. So much work has
			been done, and infrastructures have
			been put into place, and it is difficult to
			see the low numbers.
6	Federal/State	Julie Mead	Introduction of Julie:
	Updates		Provided her professional background
	opulioo		 Provided her personal stories
			\circ "Children will rise to the
			occasion. They will also
			stagnate if we do not give them
			opportunities."
			 Specially Designed Instruction – need to
			 Specially Designed Instituction – need to understand this and live it.
			\circ Need everyone at the table
1 1			-
			(special educators deneral
			(special educators, general educators, administrators, and
			(special educators, general educators, administrators, and parents).

			 Is very excited about the new leadership. Debbie Critchfield, Superintendent Greg Wilson, Chief of Staff Ryan Cantrell, Chief Deputy Superintendent If special education in your district is broken, it's because your system is broken. <u>Federal/State Updates</u>: Implementing Dyslexia Legislation (see handout) This has been a hot topic and source of contention. Julie's perspective and goal regarding dyslexia is to bring peace to the conversation. There will always be times where we agree and disagree. The amount of contention surrounding dyslexia tells her something is not right. It comes down to we are missing the boat when it comes to communication. Will continue to work on handouts like the one provided on dyslexia for other topics, too. <u>Restraint & Seclusion</u>: A bill was introduced this morning in the 	
			 House. Trying to change 33-1224, which hasn't been changed for 60+ years. This is important legislation that tries to do a few things: Corporal punishment needs to be removed from schools. Seeks to define restraints (physical, chemical, etc.) and seclusions. Prohibits the use of restraints for punishment. There was only one "nay" vote this morning; however, there is a significant typo that needs to be addressed. SDE will have sample policies and guidance ready to go if/when the bill passes. 	
7	Meaningful Parent Engagement	Julie Mead	What does meaningful mean? Purposeful, empowering, thoughtful, partnership, follow through, and clarity What does engagement mean? Actionable, invested, participatory, collaborative, equal	

· · · · ·	Τ	· · · · · · · · · · · · · · · · · · ·
		partners, active listening, timely, inclusion,
		meaning
		Three levels to Meaningful Parent
		Engagement:
		1. State to Parent – How should the
		State engage with parents?
		a. Discussion Report Out: First
		line of connection is the
		teacher. Need to do a better
		job of educating our
		teachers. Gen Ed teachers
		do not have the knowledge
		on how to help parents with
		students who need SPED.
		For the state, it starts with
		future teachers—need
		accountability for University
		partners with their teacher
		preparation programs,
		especially with soft skills
		(teamwork, communication,
		etc.). Additional thoughts
		are that Gen Ed teachers
		are being taught these skills,
		but it's not needed until later.
		There may be changes to
		the policy/processes. Need
		to make IEP meetings
		relational and less
		transactional.
		2. State to District to Parent – How
		should the State support districts in
		engaging with parents?
		a. Discussion Report Out:
		Doesn't have to be just the
		SDE but multiple other
		groups (like IPUL). In general, Idaho Coalition of
		Community Schools helps
		districts in becoming a
		community school. The
		purpose is to engage
		communities in services that
		are available at the school.
		Title 1 school—need a
		school/parent contract.
		Statewide training that is in
		place. More
		communication/team
		building regarding case
		managers and Gen Ed
		teachers. Case managers
		are there to remind folks of
		what the student needs.
		Increase in teamwork.
		3. State to District to IEP Team to
		Parent – How should the state
LI	I	

	support parents and IEP teams to
	achieve meaningful engagement?
	Lunch Activity:
	1. What do we have? What supports or
	connections do we already have in
	place?
	a. Discussion Report Out: The
	Idaho Training Clearingheuna ia a huga
	Clearinghouse is a huge resource for families and
	districts. The challenge is
	that there is so much
	material that it's difficult to
	know where to start. How
	can it be more "pedestrian"?
	Need to improve the
	marketing of this resource
	for parents and educators,
	including GED programs.
	Might be a good idea to add
	Gen Ed to the
	Clearinghouse—they are
	very open to feedback.
	2. What is missing? What supports or
	connections do we need to create or
	provide?
	a. Discussion Report Out: Peer
	mentoring could be a great
	thing—it's changing the
	school environment (in a positive way and in both
	directions). Gen Ed
	students are mentoring
	SPED students. More
	training for
	paraprofessionals.
	Onboarding for parents.
	Begin a Parent Ambassador
	program.
	3. Who else should we ask? Who can
	help us? Who are the critical
	stakeholders?
	Iulia reports there are some resources
	Julie reports there are some resources coming out from Idaho SESTA that are made
	for parents. Would like to see these used at
	IEP meetings to get everyone on the same
	page.
	Laura mentioned the Parent Handbook from
	the Idaho Department of Juvenile
	Corrections (IDJC) as a guideline to develop
	something similar for SPED.
8 Working Lunch/Discussion – Meaningfu	Il Parent Engagement

9	Group Feedback on	Julie Mead	Group Activity:	Julie's ask: If it is
Ū	SEAP Functions		How can we, the SDE, enhance your	something that
			advisory role?	would be
			 Provide updates on a more 	productive, share
			regular basis, so we don't feel	with her items that simply do not work.
			like we're starting over at every meeting.	If there is
			 When material is passed out in 	something the SDE
			advance, let us know through	has been doing that
			what lens/context you want the	is not helpful,
			feedback.	please send to her.
			 What can we bring back to the 	
			community, and who should we communicate this with?	
			 Should there be a time during 	
			the SEAP meeting that we bring	
			up issues? We talk about a lot	
			of things, but it's guided by the	
			SDE agenda. • Previously during the lunch hour,	
			 Previously during the lunch hour, there were agency and parent 	
			presentations.	
			 Executive Committee typically 	
			meets a couple of weeks prior to	
			the quarterly meeting. Do we	
			need to meet more in advance and create a newsletter?	
			 Provide ideas for follow-up. How can we 	
			reconnect you with the impact of your	
			input?	
			• A newsletter could be helpful.	
			Use the previous notes and add	
			what the SDE did in response to the item from that meeting.	
			Laura would like to expand the	
			"Action Item" column to include	
			the action on behalf of the SDE.	
			 Monthly follow-up e-mail; does not need to be longthy. We did 	
			not need to be lengthy. We did this, or we didn't do this, and the	
			why.	
			 Would like to celebrate the wins 	
			and accomplishments that come	
			from these meetings.	
			Provide ideas on how to build capacity for a better understanding of topics.	
			What is the best way to receive and	
			provide feedback on information?	
			• • The Informational Indicator	
			sheets that the SDE is starting to	
			create will be helpful.	
			 Have one of these for the Idaho System of General Supervision 	
			as well. Similar to quick guides.	
			 OSEP questions - would be 	
			helpful to have a better	
			understanding of what is being	
			asked. Consistency is	
			important.	

10	Extended Content Standards Alignment	Karren Streagle, SDE	 Provide links if people want to do research in advance. Provide information in advance of the meeting about hot topics that the panel may want to know about. Extended Content Standards (see PowerPoint handout) Idaho Alternate Assessment (IDAA) Need to bridge new Idaho Content Standards to old Extended Content Standards Reviewing the alignment and looking for any issues regarding depth, breadth, and complexity. Have 46 Committee Members (Only six people have dropped from the committees). Have parents and community members on almost every team. Have finished Phase 1 and will be starting Phase 2 tonight.
11	Cultivating Readers	Shannon	 be starting Phase 2 tonight. Next will be vertical alignment Will finalize this process in April and report out to the State Board of Education in September 2023. Thank you to Bryan Maughan for serving on the secondary English Language Arts/Literacy Committee! Bryan has really enjoyed the process and feels this has been a very good exercise.
		Dunstan, SDE Kailey Bunch- Woodson, SDE and Angela Lindig, IPUL	 PowerPoint and December Focus Group Discussion handouts) Four-year professional development project, with the goal of improving reading across all ages, but the focus for this project is up to 3rd grade. Project is set up so that the schools themselves recruit parents and bring them to the teams. In Year One, the parent is trained by IPUL. A new parent is brought in for the next year and mentored by the parent trained by IPUL in Year One. This has not quite run this way, though. Family Engagement Activities include the Serving on Groups curriculum for parents. The Leading by Convening curriculum is for school professionals. IPUL hosts monthly virtual meetings with participants and ties everything back to the initial training curriculum. Monthly leadership meetings as well; parents are supposed to be

invited to participate in these
meetings.
 Some schools have
implemented a lot of different
strategies to encourage parent
engagement and participation.
The focus today is on the barrier's
parents have identified with
implementing this program. Brainstorm
ideas on addressing the barriers.
Summary of barriers:
 Schools are not recruiting
parents in time to attend the fall
Serving on Groups training and
ongoing recruitment.
 Parents who do attend Serving
on Groups are dropping out, and
new parents need to be caught
up.
 Perceived reluctance by schools
to let parents join team meetings
(parents reporting they have
never been invited to a team
meeting by the school). There
may be questions by the teams
about sharing
identifying/confidential
information, and therefore,
parents may not be invited. The
emphasis at the trainings,
though, is that individual
students should NOT be
discussed at team meetings—
they should be discussing
system issues.
System issues.
Activity—In your group, answer the
questions within the handout.
1. How do we get parents caught up to
speed when they join throughout the
year? Ideas generated:
a. Have a mentor program for
the parents (do have this,
but some parents get
nervous).
b. Need parents to develop as
a cohort, which in-person
meetings help support.
There are some schools that
only have one parent
representative.
c. Have a parent
ombudsperson that is
statewide.
2. How do we get better attendance at
MTSS-R Leadership Team meetings
and IPUL Collaboratives for those
who did attend Serving on Groups
and Fall Institute?

			3. How do we help schools with parent recruitment and retention?	
12	Secondary Transition Updates	Randi Cole, SDE Alison Lowenthal, Voc-Rehab	 Vocational Rehabilitation and Secondary Transition CTE=Career Technical Education—The goal is to increase access to this. Ran five of these this summer and have another joining this summer (Boise). Students that have attended these are signing up for CTE classes. Hoping to see more success for students leaving their secondary programs with CTE credits. Last fall, attended regional CTE meetings to provide education on CTE and encourage more involvement for students with disabilities. Vocational Rehab funds all of these programs, and there is no cost to the districts; however, they cannot cover transportation costs, which is a barrier for more rural areas. Vocational Rehab is in the process of its Statewide Needs Assessment. If you want to provide feedback, please connect with Alison. Idaho Transition Survey (please review handouts) Shortened the parent survey this year and received 43 responses (as opposed to 7 last year). Indicator 14: Postschool Survey Call parents and students one year after graduation. Indicator 14 measures whether or not students are in higher education, higher education training, or are competitively employed. Fewer schools volunteered this year to participate in the survey; how can we increase participation? The more that participate, the better the results. An idea to make these required; however, we don't want to add more to teacher's plates. Need to strengthen process when students age out of SPED. 	Cindy Orr to provide contact information to Alison Lowenthal re: IDJC's work with CTE.

13	Wrap Up	Laura Wallis	Motion to end meeting: Brian Darcy Second: Eric Lichte Discussion: None Unanimously Approved	
14	 Meeting Adjourned <u>Next Meeting:</u> Monday, May 8, 2023, 9:00 am to 4:00 pm
