

EDPlan™

Optional Statewide Electronic IEP Program

In 2018, at the request of Idaho's local education agencies (LEAs), the state's Department of Education requested proposals for an optional statewide electronic option for Individualized Education Programs (IEPs) to optimize the creation, submission, and transfer of special education data. The electronic solution would simplify paperwork and save educators time and effort. This project was awarded to Public Consulting Group (PCG) who designed its EDPlan system to meet the needs of the State of Idaho and its LEAs—helping to drive efficiency, compliance, and student outcomes in special education.

Who is using EDPlan?

90+

Idaho school districts and charter schools

have already implemented EDPlan

Why use EDPlan?

User-friendly and seamless | EDPlan's intuitive design simplifies document development and compliance, smoothly integrating with existing student information systems and local data sources.

Reporting that works for you | Powerful, flexible reporting and analytical tools help you to receive the answers you need to drive system improvement.

Tools to help you go paperless | EDPlan offers a variety of cost-effective paperless solutions designed to increase document retention while reducing the cost and time spent managing paper.

Integrated translation capabilities | The new translation feature gives you access to automatically translate IEPs and other documents within the EDPlan system with the click of a button.

Reimbursement made simple | Our optional EasyTrac module makes school-based Medicaid reimbursement easier and more effective—to help you recover all applicable reimbursements.

Who benefits from EDPlan?

- ✔ **Students with Disabilities:** EDPlan supports a whole-child-focused process for IEP development that encourages comprehensive analysis of students' needs, so they can achieve success.
- ✔ **Special Education Staff:** EDPlan provides a streamlined, guided process that reduces the number of administrative tasks and supports collaborative IEP management.
- ✔ **Parents:** EDPlan Connect allows parents to conveniently access and sign their child's documents online. EDPlan's dynamic language translation feature gives LEAs the opportunity to supply parents with IEPs in their spoken languages—supporting access, equity, and increased engagement.
- ✔ **Special Education Administrators:** EDPlan provides convenient access to compliance management and program efficiency information.
- ✔ **Technology Staff:** EDPlan does not require special hardware or software. The system also updates automatically. This feature eliminates the need for releases to be coordinated and managed.
- ✔ **LEAs and Idaho Taxpayers:** Economies of scale from the state contract mean significant cost savings for school districts, charter schools, and taxpayers.
