

August 2016

Plan Lead: Andrew Fletcher

Present: External stakeholders

Summary:

- Hosted a webinar with 18 stakeholders, which included representation from school districts, city officials, universities, the STEM Action Center (Governor's Office), afterschool program staff, charter school teacher, public school teacher, and state department of education.
- A request for research and inquiries was made during the webinar, which included a research handout, ESSA Title IV-B, state department of education strategic plan, and the state application for Title IV-B from 2011.
- As of today, I have received feedback from 6 individuals (1 university professor, 1 public school teacher, and 4 program directors). I even made another push and requested input from more program directors; however, only 1 responded back.
- The majority of the individuals that are a part of the committee are not interested in shaping Title IV-B as much as they are about knowing the decisions we make so they can prepare for the grant competition. So far the input is more questions rather than ideas/suggestions.
